About Andy

Andy set up AB Heritage in 2009 and in the years since, has grown the company into a trusted and strategic heritage partner for many top-flight developers and civil engineering companies. With a focus on delivering high-quality and responsive services to clients, Andy has guided business growth by employing heritage professionals who share the company's unwavering core principles covering quality integrity and positive relationships. Andy has extensive experience in Archaeological and Cultural Heritage Management, with a special focus on the provision of sensitivity advice, guidance and steering on design proposals and impact assessments. He has a successful track record in delivering high-profile and strategic heritage risk advice for large and complex infrastructure projects.

Qualifications & Memberships

- BSc (Hons) Archaeology
- MA Cultural Archaeology
- Member (MCIFA) Chartered Institute for Archaeologists
- CSCS Manager and Professional Accreditation

Key Competencies

- Historic Environment Desk Based Assessments and EIA
- Heritage Consultancy
- Design and Management of Archaeological Works

Key Projects

A477 St Clears to Red Rose Road Improvement works, Carmarthenshire, 2010

The challenge for the Client was how to manage the significance of the archaeology, and its importance to the local community, with the efficient progress of much needed road improvements. Andy was embedded as part of the design team at Gifford, and designed and managed a full suite of investigation works to manage the project risk associated with the archaeology. He led a careful and phased programme on site to ensure the project stayed on course and on budget. The A477 won the prestigious George Bibby Award for 'Integration and Collaborative Working Award'

Crossrail Surface Works, South East, 2012 - 2014

Andy was project Archaeologist for the western and eastern sections of the surface routes of the Crossrail project. He was responsible for developing and managing mitigation strategy to enable the avoidance or reduction of scheme risk where possible.

A14 Road Improvements 2017

Andy has been engaged directly by Highways England to act on their behalf in a professional oversight capacity and as an interface with multiple scheme partners to advise and report on the major archaeological works that are underway as part of the early works to prepare for the road construction phase.
